

Town of
Pawleys Island
SOUTH CAROLINA

HURRICANE IRMA UPDATE – 9/12/17

The storm caused severe beach erosion to the island's coastline, especially along the southern section near Springs Avenue where most of the dunes washed out into the road. Because of this, access to Springs Avenue south of Pritchard Street will be restricted to property owners, property management agencies & contractors until SCDOT is done removing the sand.

The South End beach access will be closed until further notice.
